Stainless Steel Front Entry Door | JuSen

SKU: 1601267575310 | Category: Steel Security Doors

Product Overview

Fabricated from 16-gauge galvanized steel with a reinforced steel sub-frame, this modern entry door is engineered for high-security residential entrances. The surface features a multi-layer stained finish that resists UV fading and corrosion, while the armored core design meets villa-grade security benchmarks. Certified to EN 1627 security standard RC3, this door delivers robust protection without compromising contemporary aesthetics.

Key Specifications

Material	16-gauge galvanized steel (1.5mm skin thickness)
Door Thickness	65mm (2.56 inches)
Security Rating	EN 1627 RC3 (burglar resistance class 3)
Core	Multi-chamber steel honeycomb with PU foam insulation
Finish	Stained wood-grain effect on steel; UV-resistant polyester coating
Max Size	1200mm width x 2400mm height (single door)
Warranty	5 years against manufacturing defects

Available Options

- Single door sizes: 900x2100mm, 1000x2200mm, 1200x2400mm
- Stained finish colors: Dark Walnut, Teak, Mahogany, Grey Oak
- Hardware options: Multi-point locking system (5-point or 7-point), stainless steel handle sets, digital keypad lock
- Glass options: 6mm tempered double glazing with decorative grille or frosted privacy glass

Applications

- Main entrance doors for luxury private villas and gated communities
- High-security front doors for residences in high-crime urban areas
- Primary entry points for boutique hotels requiring a modern, upscale aesthetic
- Security doors for embassy residences or executive homes with valuable interiors

Customization Capabilities

Custom sizes up to 1400mm width and 2600mm height available for oversized openings. Stained finish colors can be matched to RAL or wood sample references, and glass insert patterns can be

designed per project requirements.

Packaging & Shipping

Each door is individually wrapped with heavy-duty foam corners, protective plastic film, and packed in a reinforced plywood crate for ocean freight. Shipping via 20ft or 40ft containers, with FOB delivery from Shanghai port.

Why Choose Us

- Factory-direct pricing with 20 Years of export experience to 60+ countries
- Custom RAL color matching and bespoke size production with 2-week lead time
- Third-party security testing available upon request (EN 1627, UL 10C)

Frequently Asked Questions

What is the burglar resistance level of this steel entry door?

This door is tested to EN 1627 RC3, meaning it resists attack from a burglar using screwdrivers, crowbars, and a sledgehammer for up to 5 minutes. The 16-gauge steel skin, reinforced steel sub-frame, and multi-point locking system provide effective security for residential use.

Can the stained finish be customized to match existing woodwork?

Yes, the stained wood-grain effect is applied via powder coating and can be matched to a wood sample or RAL color code. We offer a color matching service for large orders, with a minimum quantity of 10 doors for custom finishes.

Is this door suitable for coastal environments with high humidity?

The galvanized steel core and UV-resistant polyester coating provide corrosion resistance suitable for coastal areas. The PU foam insulation and weatherstripping also prevent moisture ingress, though we recommend periodic inspection of seals in extreme salt-spray zones.

What locking systems are available for this door?

Standard options include a 5-point locking system with stainless steel deadbolts and a key-operated cylinder. Upgrades include a 7-point system with anti-drill plates, digital keypad locks with fingerprint recognition, or Bluetooth-enabled smart locks.

What is the typical lead time and shipping method for a container order?

For a standard 20ft container (20-30 doors depending on size), production takes 15-20 working days after order confirmation and deposit. Shipping by sea from Shanghai takes approximately 25-35 days to major ports in Europe, Australia, or the Americas. Full container load (FCL) is recommended for best pricing.

1. Can I order samples before placing a bulk order?+−

Yes, sample doors are available for project evaluation. Sample lead time is typically 7-15 days, and sample fees can be credited back against your bulk order.

2. What is your standard production lead time?+−

Standard production runs 25-40 days after deposit and drawing confirmation. Urgent project timelines can often be accommodated — please share your project deadline when requesting a quote.

3. Do you offer custom sizes and hardware configurations?+−

Absolutely. Width, height, thickness, finish, hinge type, lock type, closer, panic hardware, and vision panels can all be customized to match your project specification. Send us your door schedule and we will quote accordingly.

4. Which ports do you ship from and what are the Incoterms?+−

We primarily ship from Shanghai port (China). FOB, CIF, and DAP terms are all available depending on your project requirements.

5. What payment terms do you offer for commercial projects?+−

Standard terms are 30% T/T deposit with order confirmation, 70% T/T before shipment. L/C at sight is also available for qualified larger projects.

6. Can you provide OEM / private label service?+−

Yes. We provide OEM manufacturing for distributors, contractors, and project developers worldwide. Your branding, packaging, and labels can be applied to protect your market position.
